

CURRICULUM VITAE

ALISON L JONES MD FRCP

July 2004

NAME: Alison Louise Jones

DATE OF BIRTH: 30 August 1957

NATIONALITY: British

GMC No: 2628246

EDUCATION

Cheltenham Ladies' College 1970 - 1975

Bristol University Medical School 1975 - 1980

QUALIFICATIONS

MB ChB Bristol University 1980

MRCP (UK) Royal College Physicians 1983

JCHMT Accreditation Medical Oncology 1992

MD Bristol University 1993

FRCP Royal College Physicians 1998

CURRENT APPOINTMENT

Sept 1993 → Consultant Medical Oncologist and Honorary Senior Lecturer, Royal Free Hospital, London, Hampstead, NW3 2QG
Honorary Consultant, Whittington Hospital, London, N19

June 02 → Clinical Director, Cancer Services: UCLH
Consultant Medical Oncologist, UCLH

CLINICAL AND SERVICE ACTIVITY

I was appointed as a consultant at the Royal Free in 1993 with clinical responsibility for breast, lymphoma, lung, melanoma and renal cancer. In line with my clinical interests and national government directives on the improvement of cancer care and local service development we have now increased the number of consultants in the department so I am able to specialise in my primary interest which is breast cancer. I attend 3 breast multidisciplinary teams per week and 3 NHS breast clinics. I am in the process of setting up an additional clinic for women with genetic breast cancer in conjunction with a colleague in clinical genetics. I run a research based practice, in terms of clinical trials and translational activity I have particular clinical interest in young women with breast cancer and issues relating to fertility, pregnancy, communication and menopause and I advise support organisations, such as Breast Cancer Care and Cancer BACUP on these and other breast cancer related issues and am part of a BASO group developing guidelines for pregnancy associated breast cancer.

Breast Tumour Board

I am chair of the breast tumour board within the North London Cancer Network which has a constituency of 6 separate breast cancer units. We have developed agreed published guidelines for the management of cancer within the network, including referral, treatment and follow up pathways for all aspects of breast disease. In addition we have standardised patient information leaflets across the network. We have facilitated equity of access to service, algorithms of drug usage and agreed prescribing and research activity and maintain an active trial portfolio across the network. The Breast Tumour Board is an active multidisciplinary group which meets every 2 months and has a joint meeting with the neighbouring network in Mount Vernon as an Awayday once a year. Ongoing projects include evaluation of access to support groups for patients and development of services for sentinel node biopsy according to BASO guidelines. These guidelines are being adopted by other networks.

EDUCATION

I take part in the teaching of undergraduates as part of my role as a Senior Lecturer in a University Teaching Hospital. My main interest however is in postgraduate education as follows;

1. London Course – this is a compulsory day release course for year 1 and 2 trainees in medical and clinical oncology at SpR level and is recognised by both colleges as the standard for implementation of higher training and serves as the basis for the curriculum of FRCR part 1.
2. I was co-organiser of a summer school which was an advanced practice course for trainees in years 3 and 4 of training between 1996 and 1999.
3. Deanery activity – I have been the first chair of the PAN-London specialist training committee for medical oncology since its inception and have a committee with 5 programme directors supervising approximately 70 trainees holding NTN's or LAT appointments within the Thames region. We have developed the programmes and facilitated trainee's entry into research and coordinated appraisal, RITA and advice to individual trainees as well as prioritising development of new posts. I have developed reciprocal links with the PAN-London Committee for Clinical Oncology in the interests of joint training.
4. Royal College – have served on the Joint Council for Clinical Oncology with the remit to advise on education in light of my role in co-ordinating the London

Course and continue to serve as Regional Specialty Adviser for Medical Oncology advising on new posts within the region and providing advice to doctors seeking a career in medical oncology. I regularly assess training programmes across the UK in my role in the SAC.

I have continued my own postgraduate education with regular participation in local, national and international meetings and attended appropriate courses including communication skills, interview, appraisal, equal opportunities. I have also attended courses on mentoring. I have contributed to development of interactive case presentations in breast cancer for postgraduate teaching.

My interest in education has developed with a research interest and I am now co-supervisor of a CR UK fellow who is evaluating the educational needs for medical students in their transition to junior doctors.

MANAGERIAL

1. Royal Free Hospital.

With the implementation of Calman Hine I was appointed as lead clinician within the Royal Free for 3 years advising on cancer related issues within the trust and liaising with the health authority. This was important at the time of development of cancer networks and involved close liaison with the network and trust in terms of service development. I have facilitated the first peer review process within the trust and also a CHI visit with respect to breast services. I have facilitated the development of multidisciplinary team working and tumour operational groups and cross-site working with colleagues in the joint cancer centre at UCLH.

2. UCLH.

In 2002, I was appointed Clinical Director of Cancer Services at UCLH with responsibility for a large directorate of haemato-oncology. This has been extended to involve adolescent oncology. This has been an opportunity to be involved in the transfer of services into a new hospital site and the development of an ambulatory care facility. I have set up a clinical trials facilitation committee and am instrumental in developing new consultant posts, co-ordinated site-specific care and annual governance reports and appraisal and job planning.

3. Joint Cancer Centre.

I am joint chair of the supervisory group for the Joint Cancer Centre which oversees the implementation groups for head and neck, pancreatobiliary and upper gastrointestinal cancer in light of transfer of services across the joint cancer centre. I am also on the joint cancer and peer review working group and the joint cancer and outreach development group which is looking at the development of link clinical nursing and service areas across the North London Cancer Network. In addition I set up the diagnostic board for the NLCN in 2002.

AUDIT

I liaise closely with the Audit Department to facilitate the accurate data collection within Oncology required by the Health Authority and supervise a member of the Audit Department. Within the Royal Free I have developed systematic continuing audit of protocol-driven care based on our protocol book in association with pharmacy and

nursing colleagues. I am a member of the Advisory Board for the Thames Breast Cancer Audit and am also a member of the Thames Cancer Registry Purchasers' Advisory Board.

RESEARCH

Clinical

I am active in clinical research in breast cancer and maintain a portfolio of clinical trials in the context of national research bodies such as the NCRN and also with novel agents through the pharmaceutical industry. I have been on the national steering groups for several trials including:

- MRC AB01 (metastatic)
- Angloceltic 1 and 2
- TACT (adjuvant)
- Neo TANGO (neoadjuvant)
- OPTION (ovarian protection during chemotherapy)
- Breakthrough (genetic breast cancer)

I am invited speaker and/or chair at many national and international meetings on subjects related to aspects of breast cancer care. From 1999 until 2004, I was a member of the CIRB (Central Institutional Review Board) for the Cancer Research Campaign which is the Ethics and Evaluation Committee for evaluating phase 1 and 2 studies sponsored and developed by the CRC.

Psychosocial

I was a member of the Research Steering Group for Cancer BACUP from 1998 – 2002. Our remit was to develop research questions to integrate the Cancer BACUP database and to systematically evaluate the counselling service and to develop further research questions relating to the information and support needs of patients with cancer. We obtained funding from CRUK for a studentship and support for this work which has resulted in a number of publications including a research report into the information preferences of people with cancer published in October 2001. I also served as a member of the CRC Educational / Psychosocial Research Committee until 1993 which involved evaluation and awarding of grants and following progress of studentships. I still sit on the Fellowship Award Committee for this Committee under CRUK.

At the Royal Free, I have been involved with the Department of Family Health in evaluation and communication between families when cancer is diagnosed. This work has led to publications and a change of practice with appointment of a support team for oncology patients with cancer who have children. I am on the steering committee of Continuity of Care Study, funded by the Department of Health, which is looking at the issues involved at transition points across the cancer journey for patients with different tumour types within 3 networks. I am also involved with a project looking at coping mechanisms for patients with cancer within the Royal Free.

Laboratory

My MD was a laboratory-based project evaluating the role of cytokines in relation to chemotherapy in terms of enhancing chemotherapy effect in melanoma and protection of chemotherapy side effects.

I supervised an MS student in a project looking at HER-2 in breast cancer and

evaluation of immuno-histochemical methods. I had a collaborative project within the department of haematology supervising a PhD student (Pani Theocharous, PhD completed) looking at a novel immuno-cytochemical assay to detect and keratinise epithelial tumour cells in the peripheral blood of patients with cancer, in particular breast cancer and to evaluate the importance of these cells as prognostic and predictive factors in relation to treatment.

I am principal study investigator on a project with Department of Health funding evaluating the pharmaco-genomics of anthracycline mediated cardio-toxicity, which is an important area for the long term safety and health of women who have received adjuvant treatment for breast cancer (principal investigator Professor H. Montgomery).

STUDENTSHIPS AND GRANTS

1. Rebecca Watson MSc.
2. Pani Theocharous Immuno-histochemical detection of epithelial cells in bone marrow.
3. Jude Gaffan. CR UK Fellowship. I am co-supervisor for Dr Jude Gaffan who has recently obtained a CR UK Fellowship for a project 'The Needs and Understandings of Medical Students in Relation to Cancer During their Transition from Medical Student to Pre-Registration House Officers'.

1. Continuity of Care Study (NHS service delivery organisation).
2. Communication with primary care, North London Workforce Development Confederation (this was a 2 year project to develop a pool to facilitate communication between primary and secondary care in relation to patients with cancer thereby improving referral and follow up pathways. This has been done in conjunction with the Medic-to-Medic project and has been completed for 5 cancer types and is being piloted with local primary care.
3. Peri-menopausal bone loss, Grant holder Novartis.
4. Pharmaco-genomics of anthracycline mediated cardio-toxicity, Department of Health grant.

I am a regular reviewer on grant applications for Breast Cancer Care and CRUK (psychosocial studentships)

ADVISORY BOARDS

CHARITIES

I am a medical adviser for Europa Donna, the European patient advocacy group for breast cancer and regularly lecture for them. I also provide regular advice and

participate in national and local meetings through lectures and workshops for breast cancer care. I am a specialist adviser for Cancer BACUP. At a local level I am an adviser to the Cancer Counselling Trust and a medical adviser to Cancerkin, a hospital based support group for women with breast cancer. I am a trustee for the Marc Fisher Trust a charity sponsoring research into lymphoma, set up in memory of a patient.

PREVIOUS APPOINTMENTS

Aug 1980 - Feb 1981	House Physician, Gloucester Royal Infirmary Dr S Wilkinson
Feb 1981 - Aug 1981	House Surgeon, Princess Margaret Hospital, Swindon Mr P Huddy
Aug 1981 - Aug 1982	Senior House Officer, General, Chest and Gastrointestinal Medicine and Rheumatology Good Hope General Hospital, Sutton Coldfield Professor B H Bass & Dr P Hillenbrand
Aug 1982 - Aug 1983	Senior House Officer, General Medicine and Clinical Haematology, East Birmingham Hospital Dr M Leyland
Aug 1983 - Aug 1984	Registrar, General Medicine, Hackney Hospital, London Dr M Clark & Dr P Kumar
Aug 1984 - Aug 1985	Registrar Medical Oncology & Palliative Medicine, Royal Marsden Hospital, Fulham Road, London Dr E Wiltshaw & Dr G Hanks
Aug 1985 - Aug 1986	Registrar in Clinical Haematology, St Bartholomew's Hospital, London Professor A Waters & Dr J Amess
Aug 1986 - Aug 1988	Clinical Research Fellow and Honorary Registrar, Institute of Cancer Research and Royal Marsden Hospital, Sutton Dr J Millar
Aug 1988 - July 1992	Senior Registrar and Lecturer in Medicine, Royal Marsden Hospital and Institute of Cancer Research, London and Surrey
July 1992 - Sept 1993	Locum Consultant Medical Oncologist, Royal Marsden Hospital, Fulham Road, London

LEARNED SOCIETIES

Royal College of Physicians:

Side-effects of Chemotherapy: A Pocket Reference.
Science Press, UK. 1995.

MISCELLANEOUS

Review of the pattern of cancer services in England and Wales.
Association of Cancer Physicians 1994 (member of writing committee).

Patient Information Study. Final Research Report October 2001. Geraldine Leydon
for Project Team.

APPENDIX 1

LECTURES TO CONFERENCES AND LEARNED SOCIETIES

- 1 British Association of Cancer Research, December 1987.
Effect of recombinant human interleukin-1 (IL-1) and recombinant human granulocyte-macrophage colony-stimulating factor (GM-CSF) on haemopoietic tissue *in vivo* and *in vitro*.
- 2 European Congress Clinical Oncology, Madrid 1987.
Tumour necrosis factor: clinical and laboratory observations.
- 4 European Congress Clinical Oncology, London 1989.
A phase I trial of human tumour necrosis factor using consecutive daily doses.
- 5 Second Nordic Novantrone Symposium, Oslo 1989.
Chemotherapy of advanced breast cancer using mitomycin C, mitoxantrone and methotrexate (3M).
- 6 British Breast Group, Oxford 1990.
Inhibition of peripheral aromatisation by CGS 16949A in breast cancer patients: measurement *in vivo* by a new urinary (HPLC) method.
- 7 Nottingham International Breast Cancer Meeting, 1990.
 1. Feasibility of tamoxifen in chemoprevention of breast cancer.
 2. *In vivo* assessment of the non-steroidal aromatase inhibitor CGS 16949A in post-menopausal women with breast cancer.
- 8 British Association for Cancer Research/Association of Cancer Physicians, Manchester 1991.
 1. Carboplatin, vinblastine and methotrexate (CVM), an effective low toxicity regimen for small cell lung cancer.
 2. ZENIPLATIN (CL 286,558), an active new platinum analogue in advanced non-small cell lung cancer (NSCLC): a phase II study.
- 9 Cancer Relief Macmillan Fund, Cambridge, August 1991.
Update on management of breast cancer.
- 10 International Conference on Hormones in Cancer, Amsterdam 1991.
Update of Royal Marsden Hospital tamoxifen prevention programme.
- 11 Occupational Lung Disease Course, National Heart & Lung Institute, April 1991.
Mesothelioma: clinical and therapeutic aspects.

- 12 European Congress Clinical Oncology, Florence 1991.
1. Intermediate results of a phase II trial: sequential fractionated administration of low dose dacarbazine (DTIC) and fotemustine in disseminated malignant melanoma.
 2. Dexamethasone is as effective as ondansetron in the prophylaxis of emesis induced by moderately emetogenic chemotherapy.
- Westminster and Royal Marsden course in Surgical Oncology, London 1991.
Principles of chemotherapy.
- 13 British Association for Cancer Research/Association of Cancer Physicians, Southampton 1992.
1. A randomised trial of high vs conventional dose carboplatin for previously untreated ovarian cancer.
 2. A randomised phase II trial of carmustine (BCNU) alone or in combination with tumour necrosis factor alpha (TNF α) in patients with previously untreated malignant melanoma.
- 14 Aspects of Oncology Seminar, Royal Marsden Hospital, London 1992.
The incidence of second malignancy.
- 15 6th World Conference on Lung Cancer, Melbourne 1991.
A randomised trial comparing a low toxicity regimen - carboplatin, vinblastine and methotrexate, against adriamycin, cyclophosphamide and etoposide in small cell lung cancer.
- 16 3rd Mediterranean Meeting on Cancer, Naples 1992.
Neoadjuvant Chemotherapy of Breast Cancer.
Update in Cardiopulmonary Pathology- Lung Cancer, Brompton Hospital
Chemotherapy for Small Cell Lung Cancer.
- 17 5th Post Graduate Course on Clinical Oncology, Lisbon 1992
Medical Treatment of Breast Cancer: New Perspectives
- 18 Advanced Course on HRT, London 1992
HRT, Breast Disease and Cancer Prevention
- 19 Aromatase meeting, Bologna 1992
Prospects for Aromatase Inhibitors in adjuvant treatment of breast cancer
- 20 Cancer Relief Macmillan Fund Symposium, Milton Keynes 1992
Breast Cancer: Trends in Treatment
- 21 5th International Oncology Nursing Conference, Vienna 1992
Chemoprevention of Breast Cancer
- 22 Nottingham International Breast Cancer Meeting, 1992
Adjuvant aminoglutethemide for post menopausal women with primary breast cancer: analysis at 8 years

- 23 Collège de Gynecologie de Bordeaux et du Sudoest, 1993
Chemoprevention of Breast Cancer
- 24 Cancer. Management Today. Henley Management Centre, Oxon, January 1993.
Clinical and economic factors in use of 5HT₃ receptor antagonists.
- 25 First West of London Cancer Research Meeting, London, February 1993
Infusional chemotherapy for breast cancer
- 26 Oncology '93, London
Modern Effective Control of Emesis
- 27 British Association of Cancer Research 1993
Primary medical (neoadjuvant) chemotherapy with continuous infusional 5-FU, epirubicin and cisplatin for large operable breast cancer: a very active new regimen.
- 28 British Menopause Society, Glasgow 1993
Chemoprevention of Breast Cancer.
- 29 Nottingham International Breast Cancer Meeting 1993
Primary medical chemotherapy with continuous infusional 5-FU, epirubicin and cisplatin for large, operable breast cancer: a very active new regimen.
- 30 St. George's Hospital London. Primary care of breast cancer. December 1993.
- 31 III International Symposium on Breast, Sept 1993, Brazil
- 1) Molecular biology in the prognosis of breast cancer
 - 2) Future directions in breast cancer
 - 3) Treatment of massively involved axilla
 - 4) Tumour markers
- 32 Royal College of Radiologists Breast Meeting on Mammography. Cheltenham 1993.
Adjuvant and Neoadjuvant Chemotherapy.
- 33 European Congress Clinical Oncology, Jerusalem 1993
- 1) Primary medical therapy (ECF) for operable breast cancer using infusional chemotherapy.
 - 2) Chemoprevention of breast cancer: RMH Update.
- 34 C.A.P.E. December 1993. Update on medical management of breast cancer. London.

- 35 Royal College of Obstetricians and Gynaecologists February 1994. Chemotherapy in Gynaecological Cancer.

- 37 British Breast Group 1994
- 38 Cancer Research Campaign. Southern Regions Annual Meeting. City University London. Sept. 1994. Breast cancer.
- 39 Second Congress on Controversies in Oncology, Spain March 1994.
 - 1) Neoadjuvant chemotherapy in breast cancer.
 - 2) High dose chemotherapy in breast cancer.
- 40 Newcastle April 1994. Aromatase inhibitors: future developments.
- 41 American Society of Clinical Oncology 1994 (Dallas). Phase II study of loxoxantrone in previously treated and untreated patients with advanced breast cancer.
- 42 The Management of Liver Cancers: State of the Art. Royal Free Hospital. Jan 1995. The Role of Systemic Chemotherapy.
- 43 Int. Congress Chemotherapy, Montreal 1995. Chemoprevention of Breast Cancer (The British Tamoxifen trials) Ab 0008.
- 44 Royal Society of Medicine. Workshop. Cancer in the Elderly 1995. Health in later life: advanced access and equity.
- 45 Cancer Research Campaign. Southern Regions Annual Meeting. City University London. Sept. 1994. Breast cancer.
- 46 Association of Cancer Physicians in Training. Durham. Sept 1995. Management of ovarian cancer.
- 47 North Western Breast Cancer Group. Manchester March 1995. Controversies in high risk primary breast cancer.
- 48 Europa Donna. Vienna 1995. Update on management of breast cancer.
- 49 Junior Oncology Club. London. May 1996. Training in Medical Oncology.
- 50 Breast Cancer 2000. Royal Society of Medicine Dec 1996. Primary Medical Therapy.
- 51 North Thames Cancer Registry. Prospective Audit of Breast Cancer. 1998. Royal Society of Medicine. Chemotherapy Update.
- 52 Royal Free Scintimammography Masterclass 1998. Royal College of

- Physicians.
Breast Imaging - what the oncologist wants. 1st European Breast Cancer Conference 1998.
- 53 5th Marianna Lordos Seminar. Cyprus Anti-Cancer Society 1998.
1) Dose intensification in breast cancer. 2) Cancer diagnosis and treatment - challenges and future hopes. Keynote lecture.
- 54 Nottingham Breast Cancer Meeting September 1999.
Managing HER2 positive patients with antiHER2 therapy.
- 55 Chemotherapy and Pregnancy
Breast Cancer, Pregnancy, Lactation & Hormone Replacement Therapy.
Dec. 1999. Royal Free Hospital, London.
- 56 Symposium: New Skills in Oncology. Amsterdam Feb 2000.
New advances in endocrine therapy.
- 57 Symposium: Breast Key Advances. Royal College of Physicians. Feb 2000.
- 58 UK Breast Cancer Coalition.
Training Seminar: The Gold Standard in Breast Cancer Care. November 2000.
- 59 Key Advances in Effective Management of Breast Cancer, Royal College of Physicians.
Scientific evidence and expert clinical opinion for first line therapy in metastatic disease: sequential single agent versus combination therapy – July 2001.
- 60 24th Annual San Antonio Breast Cancer Symposium.
Targeted Therapy: The New Standard of Care in Breast Cancer: Case Study: Novel Therapies for Estrogen Receptor-Positive Patients. December 2001.
- 61 3rd European Breast Cancer Conference, Barcelona.
The Management of Breast Cancer and Pregnancy. March 2002.
- 62 Oncology Congress, Thessaloniki, Greece.
Herceptin – Current Use and Future Prospects. April 2002.
- 63 5th Meeting of the London Breast Cancer Forum. Royal College of Physicians.
Management of Early Breast Cancer: Controversies. April 2002.
- 64 Edgware GPs Luncheon Club.
Women's Cancer Epidemiology. May 2002.
- 65 London College of Beauty Therapy.
Living with Breast Cancer. May 2002.
- 66 Oncology Planning Meeting. Royal College of Physicians: Debate and Discussion. May 2002.

- 67 Ask the Expert Charity Lecture: What you always wanted to know about the latest developments in chemotherapy – What's new in breast cancer. July 2002.
- 68 Challenges in Oncology, Dublin (Chair of Session 2).
New Potential – Relevant new signals, new targets. October 2002.
- 69 ESMO. Roche Satellite Symposium Lecture, Nice.
Herceptin Safety. October 2002.
- 70 London Breast Forum (Chair). November 2002.
- 71 European Conference on Navelbine Oral. Seville.
Navelbine in ABC: from IV to oral form. November – December 2002.
- 72 Key Advances in Clinical Management: Breast Cancer Conference. Royal Society of Medicine.
Breast Cancer Adjuvant Treatment – Chemo VS Endocrine. December 2002.
- 73 Mount Vernon Breast Cancer Network.
Pregnancy and Breast Cancer. February 2003.
- 74 Dublin. March 2003
Herceptin (trastuzumab): Future Horizons in Targeted Therapy.
- 75 RCP (Roche).
New Perspectives in Breast Cancer chemotherapy – Treatment of advanced breast cancer: what's the best practice?
June 2003
- 76 Birdcage Walk (Aventis) Greater London Breast Cancer Forum (Chair).
Panel discussion: Is breast cancer a chronic disease? June 2003.
- 77 Breast Cancer Care Conference, Royal College of Physicians.
Into the future: Perspectives on Breast Cancer – Reflections on 30 years in Breast Cancer. July 2003.
- 78 Dominican Republic (Roche Latin America).
What does Herceptin offer for the future of cancer care?
& The Future: Optimising Inhibition of EGFR and HER-2 Pathways.
July 2003.

- 79 European Congress on Clinical Oncology, Copenhagen. 2003.
Xeloda / Docetaxel Combinations.
- 80 Hanbury Manor (Joint Network Meeting). 2003.
Metastatic Breast Cancer: Sequential versus Combination Therapy.
