## CLINICAL EXPERIENCE

At Ealing Hospital I am Director and sole Consultant (7 sessions) of the Vascular Unit. Ealing Hospital provides vascular cover for a population of 250,000. My team includes a career Registrar, a Senior House officer, a House officer, a risk factor modification expert for patients with peripheral arterial disease (Dr Sandhu) and 2 vascular fellows. Every week I also conduct an arterial clinic, a venous clinic, an outpatient ultrasound guided foam sclerotherapy clinic and a leg ulcer clinic. Once per month I also provide a risk factor modification clinic for patients with peripheral vascular disease. I have a full day and a half day theatre list. I closely collaborate with the neurologist, diabetologists, cardiologists, endovascular radiologists, nephrologists and other specialists in our hospital in order to provide a multidisciplinary approach in the management of complex vascular cases. I see approximately 3000 outpatients per year and in my unit 400 operations are performed yearly.

At Charing Cross I provide emergency vascular cover for a population of 1,000,000. I am supported by a registrar, an SHO and a HO.

The cardiothoracic service is based at Hammersmith. I perform combined surgical procedures with the cardiothoracic surgeons and consult for vascular emergencies.

## TEACHING EXPERIENCE

All my jobs involved teaching of medical students, which I consider a very rewarding experience. My teaching sessions include lectures, ward rounds and teaching by the bed side for the senior medical students. My lectures are illustrated with a personal collection of slides of relevant interesting cases. I am currently group leader for the Imperial College medical students for their training in surgery at Ealing Hospital and I am a tutor in the problem based learning module to the second year medical students. I have been an active member of the admissions panel of the IC for the last 6 years. Other educational activities I have been involved include:
